INTERNSHIP OBJECTIVE

Data-driven Mathematics student specializing in Big Data Analytics with a quantitative background and hands-on experience in data analysis through academic projects and certificates. Seeking a Data Analytics internship starting 28 September 2026 to 17 January 2027 to address real business challenges and grow my technical expertise in a professional environment.

EDUCATIONAL BACKGROUND

Bachelor of Science (Hons.) in Mathematics (2023 – 2027)

Universiti Teknologi MARA | Big Data Analytics | CGPA – 3.9 | Dean's List Award (Semester 1-5)

Subject Related: *Fundamentals Of Computer Problem Solving, Database Design and Development, Business Data Analytics, Statistical Methods, Programming for Data Science, Data Mining, Data Representation and Reporting Techniques.*

Foundation in Science (2022 –2023)

Universiti Teknologi MARA | CGPA: 3.91

Sijil Pelajaran Malaysia (SPM) (2017 – 2021)

Sekolah Menengah Kebangsaan Taman Setiawangsa | Science Stream; 5A+ 3A 1B+

CERTIFICATES

Certificate Google Data Analytics | Coursera

Certificate Google Advanced Data Analytics | Coursera (Current)

PROJECTS

Vehicle Insurance Fraud Detection Dashboard (Current)

Power BI, RapidMiner, Excel

- Prepared a clean vehicle insurance claim data using Excel and RapidMiner by performing data cleaning and transformation to improve data quality and support fraud analysis.
- Developed an interactive Power BI dashboard to visualize fraudulent and legitimate insurance claims across demographics, policy information, accident details and temporal trends.
- Analysed fraud indicators and claim patterns by exploring relationships between vehicle attributes, policy information, and customer demographics to uncover informed decision-making.

Mixed Convection Stagnation Point Flow of Ternary Nanofluid over a Porous Stretching/Shrinking Sheet (Current)

MATLAB, Excel

- Formulated mathematical models involving mixed convection stagnation point flow using Partial Differential Equations (PDEs) and similarity transformations.
- Implemented numerical computation using MATLAB bvp4c solver to obtain solutions for ternary hybrid nanofluid flow and heat transfer models.
- Analysed velocity, temperature, skin friction coefficient, and local Nusselt number graphs to study heat transfer behaviour under different physical parameters.

Predicting Hotel Booking Cancellations

RapidMiner, Excel, Tableau

- Processed and prepared a clean booking dataset in Excel and Weka, performing data cleaning and transformation to ensure model readiness for analysis.
- Developed and refined classification models in Weka, achieving the best model with an accuracy rate of 83.16% by comparing various data-split methods to ensure optimal model validation and predictive reliability.
- Identified critical business insights for hotel management, specifically highlighting customer segments.

Sentiment Analysis on Consumer review towards Suka Dessert in social media

RapidMiner, Excel

- Retrieved raw of data from Google Review using a web scraper and performed data cleaning and transformation to ensure accuracy and reliability.
- Utilised NLP techniques including tokenization and stop-word removal within RapidMiner to preprocess unstructured text for model training.
- Developed a sentiment classification model to categorize reviews into positive, negative and neutral, achieving an 63.71% accuracy rate.

EXTRACURRICULAR INVOLVEMENT

Career Ambassador Club

- Actively participated in the Career Ambassador Club at UiTM Shah Alam, assisting with career development initiatives and events.
- Coordinated large-scale career events including CAIREX (Career & Industry Relations Expo) in collaboration with TalentBank and Yes! MyNext Move with MyNext by TalentCorp, bridging the gap between students and corporate recruiters.

Library Volunteer (PTAR)

Contributed to community engagement initiatives and library programs as a volunteer at Perpustakaan Tun Abdul Razak (PTAR), UiTM Shah Alam.

Committee Member (AJK Kuiz Matematik), International Mathematics Day UiTM 2026

Developed an interactive mathematics game using AL Studio, applying AI-based tools to enhance participant engagement.

SKILLS

Technical Skills :	Microsoft Excel (Advance), Python (Proficient), RapidMiner (Proficient), MATLAB (Proficient), Weka (Proficient), R (Intermediate), SPSS (Proficient), Maple (Proficient), Tableau (Intermediate), Power BI (Intermediate), SQL(Basic)
Soft Skills :	Communication Skills, Independent, Flexible, Leadership, Teamwork
Language :	Malay (Native), English (Intermediate, MUET Band 4)
